

A simple Dice Roll: An example of QS-TEX in R

September 4, 2017

We roll a dice 10 times and get the values:

2, 4, 4, 6, 2, 6, 1, 6, 1, 3

These have a mean of 3.5 and a standard deviation of 2.013841. This gives us a boxplot of the form:
